How can we help reach the endpoint? <ul style="list-style-type: none"> ○ Does the India section anticipate submission of the method for review by the ERP? ▪ Define the matrices ▪ Run an SLV ▪ Publish the method

III. **AN OFFICIAL METHODSSM UPDATE**

Darryl Sullivan and Deborah McKenzie (AOAC) discussed with the ERP, the path forward in removing older versions of the AOAC SPIFAN methods currently in OMA. To revise the *Official Methods of AnalysisSM* (OMA) Chapter 50 to replace older methods with current AOAC SPIFAN Final Action methods. Learn where and how the methods are being used with feedback to the ERP. Also, the method(s) must demonstrate value, or the ERP will recommend repealing the methods with rationale and verification on their current status to the Official Methods Board (OMB).

Recommendations included the process take several phases with phase 1 begin with the following:

- Identify and review problematic methods
- Ensure OMA contain state of the art methods
- Review QC methods that work, but were not selected

PROPOSAL:

Reengage the working group chairs to review the methods and bring information back to the ERP for final recommendation.
